Thanks to its IP67 water, shock, and dust resistance, it's an excellent choice for vapers who want a reliable device for everyday use without worrying about accidental drops or splashes.

One of the standout features is its compatibility with Geekvape's P Series coils, ensuring flavorful vapor production and long-lasting coil life. The device operates with a single 18650 battery, which keeps it lightweight and easy to carry.

Setting Up Your Geekvape Aegis Nano: Step-by-Step

Getting started with your Geekvape Aegis Nano is straightforward, but following a few key steps ensures safety and optimal performance.

For charging, the Aegis Nano supports USB Type-C fast charging. Connect the device to a power source using the USB-C cable provided. It's recommended to use a wall adapter with 5V/2A output for faster and safer charging. Avoid overcharging by unplugging once fully charged.

Filling the Pod

The Aegis Nano uses refillable pods with a bottom-fill design. To fill the pod:

1. Remove the pod from the device by pulling it out gently.
2. Open the silicone plug located on the side or bottom of the pod.
3. Fill the pod with your preferred e-liquid, avoiding overfilling.
4. Close the plug tightly to prevent leakage.
