1. Use Visual Aids

Maps, globes, and interactive tools are invaluable for learning geography. Visualizing where countries and landmarks are located can make it easier to remember their positions relative to each other.

2. Break It Down by Region

Instead of trying to learn the entire world at once, focus on one continent or region at a time. For example, start with European countries and capitals, then move to South America. This approach reduces overwhelm and builds confidence.

3. Leverage Mnemonics and Associations

Creating memory aids can be very helpful. For instance, associating the shape of Italy with a boot or linking Egypt's pyramids to its capital Cairo can make facts stick better.

4. Practice Regularly

Like any subject, consistency is key. Taking quick quizzes daily or weekly strengthens retention and gradually expands your knowledge base.
