Cleaning the Brush Roll and Pet Hair Strainer

One standout feature of the Crosswave Pet Pro is its ability to handle pet hair without clogging. The manual suggests removing the brush roll regularly to clear away hair and debris. Emptying and Rinsing the Water Tanks

The dual-tank system is what makes the Crosswave Pet Pro so effective at washing and drying floors simultaneously. According to the manual, after each cleaning session, empty both the clean and dirty water tanks. Then rinse them under warm water to prevent mold and unpleasant odors. The manual also recommends leaving the tanks open to air dry before the next use.

Filter Care and Replacement

Filters play a vital role in trapping dirt and allergens. The manual advises checking the filter periodically for clogs and cleaning it as needed. Over time, you may need to replace the filter to maintain optimal cleaning performance, and the manual provides instructions on how to do this safely.
