Troubleshooting Common Issues with Your Harbor Breeze Fan

Even with a well-written manual, problems can arise. Knowing some basic troubleshooting tips can save you time and frustration.

Fan Doesn't Turn On

If your fan fails to start, check the following:

- Ensure the circuit breaker is on and the wall switch is flipped to the “on” position.
- Verify wiring connections in the ceiling box are secure and correctly matched.
- Inspect the remote control batteries or ensure it is properly synced to the fan receiver.

Fan Wobbles or Makes Noise

A wobbly fan is usually a sign of unbalanced blades or loose screws.

- Use the balancing kit often included in the manual to adjust blade weights.
- Tighten all screws on the blades and mounting bracket.
- Check for any bent blades and replace if necessary.

Light Kit Not Working

If the fan's light does not operate, make sure:
